

For qualified organizations, enjoy a **\$3,500 flat fee** engagement cost.

NO COST for organizations that meet Microsoft requirements.

Protect & Govern Sensitive Data

Understand the hidden compliance risks of dark data

Assess your environment against key data protection standards and regulations

Receive an analysis and report on findings and associated risks

Learn about tools and services that can mitigate risks

Explore recommendations and next steps

Discover risks from dark data and learn how to address them

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used, and compliance risks that may exist.

The Protect & Govern Sensitive Data Workshop gives you the insights you need to better discover, protect, and govern your corporate data.

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to mitigating and controlling privacy and regulatory risks is more important than ever.

By attending this workshop, our experts will work with you to:

- Document your compliance objectives and strategy
- Identify privacy and regulatory risks in organizational data (Exchange Online, SharePoint Online, OneDrive for Business and Teams)
- Understand how Microsoft technologies can accelerate your compliance journey
- Provide actionable next steps to mitigate the identified privacy and regulatory risks

For qualified organizations, enjoy a \$3,500 flat fee engagement cost.

NO COST for organizations that meet Microsoft requirements.

Microsoft Purview Portfolio Overview

Recommendations and Next Steps

Data Risk Check

The Data Risk Check surfaces privacy and regulatory risks in Exchange Online, SharePoint Online, OneDrive for Business and Teams. Data Risk Check leverages automated Microsoft Purview tools and services to discover data stored in the Microsoft Cloud and identify potential problem areas.

The automated discovery process will analyze your existing data for:

- Sensitive information and intellectual property
- Unused or "stale" data
- Risky or suspicious activities

By the end of this workshop, you will receive a:

- Compliance Manager Tenant Assessment report with suggestions and top key improvement actions
- Data Risk Check report that includes findings and insights from the automated discovery process
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps

ProArch was founded on the belief that a future where change is "business as usual" is fundamentally more exciting than one where it is not.

We accelerate value and increase resilience for our clients with consulting and technology—enabled by cloud, guided by data, fueled by apps, and secured by design.
